EXPERIENCE

ANGULARJS DEVELOPER

Toyota Motor Europe

04/2024 - Present

Developing a GUI for a user management system. This application will be used by Toyota dealers to manage their employees. I am responsible for developing AngularJs components, new pages and functionalities. I made the designs to ensure a good UX. I worked in multidisciplinary team where the spoken language was English. Part of my responsibility was reviewing and testing code and reporting bugs.

REACT DEVELOPER

UniPartners (internal project)

07/2023 - 04/2024

Developing a platform to manage a smooth communication between employees and the organisation. It is used to fill in timesheet, enroll for trainings and events, share news with the employees, etc. My responsibilities included developing React components and new functionalities, making and following designs using SCSS, and reviewing and testing code. This project took place in an Agile Scrum team.

ANGULAR DEVELOPER

Personal project

2023 - 2023

Single-page desktop application built in Angular. The application was used to compare prices of different service providers and show your savings based on input from the user. I designed and developed the application. Graphs were shown through ApexCharts.

FULLSTACK DEVELOPER

Athora

05/2022 - 06/2023

My day-to-day tasks included solving incidents and testing the solutions of others. I was part of an English and French speaking, Agile team. I had to quickly navigate legacy Java and AngularJs code.

FULLSTACK DEVELOPER

Cebir NV

2020-2022

Maintaining and developing new features in legacy code, fixing bugs and testing code. The application was built using AngularJs and PHP.

EDUCATION

BACHELOR TOEGEPASTE INFORMATICA 2020
